ATTENDEE TESTIMONIALS

Well organized and extremely informative! Amazing Program! So glad to have been a part of it

Overall, I found this to be a very inspiring event! As someone who does not live in Manchester, I learned a lot about the programs and people who are working hard to make Manchester a better and stronger community.

I gained valuable information about how to improve the way our business operates, and made connections with people I hope to work with in the future.

The devil is in the details, and the details were nailed. The Whova app was a game changer in the world of conferences and networking.

This was a great introduction to the Manchester business community, as I had previously worked in the Concord area. This conference was hugely beneficial to me, topics were great, and I want to go again next year. I loved doing the interactive polling on the app during live sessions.

This conference format is great for teams from the same organization, so they can divide and conquer all sessions.
